Election/Restrictions

Applicants' election of the invention of the compounds corresponding to group III without traverse is noted. Accordingly, claims 29-33, drawn to the non-elected subject matter are withdrawn. Claim 28 will be searched to the extent it reads on the elected species and will be extended to the scope of the other species upon determination of allowable subject matter pursuant to current rejoinder practice.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 28 is rejected under 35 U.S.C. 103(a) as being unpatentable over Brackenridge US 3959387 taken with Boswell et al US 4020112 and Forster et al US 4194054.

Brackenridge teaches brominated biphenylethers which contain a fluorine substituent. See, for example, column 3 lines 27+ and column 2 lines 44+ particularly line 55. it is also noted the degree of bromination is a function of the

amount of fire retardance required. The claimed hexabromo compounds would have been obvious to one of ordinary skill in the art in light of these teachings.

Particularly in further view of Boswell et al and Forster et al. See, respectively, column 1 column 10 and column 16, and, column 1 lines 10-18 where R is arlyoxy with at least one halogen.

No claim is allowed.
